Client Data Protection & Information Security Policy

1. Purpose

KosmiConnect LLP is committed to safeguarding the confidentiality, integrity, and availability of all client information entrusted to us.

This policy outlines our approach to protecting client data in accordance with Information Security Management System (ISMS) best practices.

2. Scope

This policy applies to:

- All client data handled by KosmiConnect LLP
- All employees, contractors, agents, and third-party service providers
- All information systems, networks, applications, and communication channels

Client data includes, but is not limited to, personal data, business records, financial information, call recordings, credentials, and proprietary client materials.

3. Information Security Principles

KosmiConnect LLP adheres to the following core principles:

Confidentiality: Client data is accessible only to authorized personnel

Integrity: Data is protected from unauthorized alteration or destruction

Availability: Data is accessible when required for authorized business use

4. Data Classification & Handling

Client data is classified based on sensitivity and criticality.

Access to client information is granted strictly on a need-to-know basis.

Secure handling procedures are enforced for storage, transmission, and disposal.

5. Access Control

Unique user IDs and strong authentication mechanisms are implemented.

Role-based access control (RBAC) is enforced.

Access rights are reviewed periodically and revoked immediately upon termination or role change.

6. Data Storage & Encryption

Client data is stored in secure systems with controlled access.

Encryption is used for data at rest and in transit where applicable.

Physical records, if any, are securely stored and disposed of using approved methods.

7. Network & System Security

Firewalls, anti-malware, intrusion prevention, and monitoring tools are deployed.

Systems are regularly patched and updated.

Unauthorized devices, removable media, and external storage are restricted.

8. Employee Awareness & Training

All employees receive mandatory information security and data protection training.

Confidentiality agreements are signed by staff and contractors.

Regular awareness programs are conducted to reinforce security responsibilities.

9. Third-Party & Vendor Management

Third parties handling client data are assessed for security compliance.

Data protection clauses are included in vendor agreements.

Access by third parties is monitored and restricted to defined purposes.

10. Incident Management & Breach Response

Information security incidents are promptly identified, reported, and investigated.

An incident response procedure is in place to minimize impact.

Clients are notified of any confirmed data breach in accordance with contractual and legal obligations.

11. Business Continuity & Backup

Regular data backups are performed and securely stored.

Business continuity and disaster recovery plans are maintained and tested.

Measures are in place to ensure service availability during disruptions.

12. Compliance & Legal Obligations

KosmiConnect LLP complies with applicable data protection and privacy laws, including:

Contractual client requirements.

Applicable local and international data protection regulations.

ISO/IEC 27001 information security control objectives used as a guide.

13. Monitoring, Audits & Continuous Improvement

Information security controls are monitored and reviewed regularly.

Internal audits are conducted to assess policy effectiveness.

Continuous improvement is driven through risk assessments and corrective actions.

14. Policy Review

This policy is reviewed periodically or upon significant changes to:

1. Business operations 2. Legal or regulatory requirements 3. Information security risks

15. Commitment Statement

KosmiConnect LLP is fully committed to maintaining the highest standards of information security and client data protection.

Protecting our clients' information is a core part of our operational integrity and business ethics.
